Claim Rejections - 35 USC § 112

Claims 6-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 6 depends from itself. It is assumed to depend from claim 5.

The recitation of "modes" is indefinite since no structure is associated therewith. The recitation of a "mode" is recitation of an operating condition which needs supporting structure or means.

The recitation of a "sixth" mode, in the absence of modes 1-5 is ambiguous, claim 16.

The recitation of a spring failure mode is indefinite since a spring has not been recited.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3,7,8 and 10 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Marlatt et al.

See controller 36, door 10, input 44, etc., clutch 46, axle 24 and gear 42. The recitation of "alarm modes" is met as best understood.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4,11-16,18-20 and 61 are rejected under 35 U.S.C. 103(a) as being unpatentable over Marlatt et al in view of Crimmins.

Crimmins discloses a fire door that incorporates position monitors, back-up power sources, obstruction sensors, audible and visual alarms, open, close, stop, test and reset buttons and modes, etc., all of which could easily be incorporated with the Marlatt et al door so as to fully automate the door.

Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Marlatt et al in view of Elliott et al.

Marlatt et al states that other operating means are also contemplated, column 3, lines 32-36. Elliott et al discloses that a hand crank is well known in this art and it would have been obvious to provide such for Marlatt et al so as to avoid the need for an electric motor.

Allowable Subject Matter

Claim 60 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 3634

Claims 6 and 9 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
